

# A POWERFUL PARTNERSHIP

Top-tier training programs are now available to utilities across North America.

The NUI TF, in collaboration with the electrical training ALLIANCE—the industry’s premier educational resource provider—is making our curriculums available to utilities in the United States and Canada. We provide personalized learning management systems that allow for utility-specific branding as well as training management systems for hands-on control of your account.

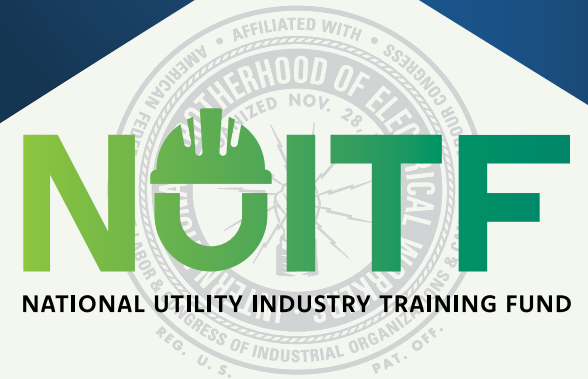

Contact us to provide your employees with the best educational material in the industry. For more information, reach out to us at [training@nuitf.org](mailto:training@nuitf.org).

Strengthening Today’s Workforce  
for Tomorrow

# TRAINING FOR THE UTILITY INDUSTRY'S FUTURE

The National Utility Industry Training Fund (NUI TF) knows that quality training is critical to success in the utility industry. Continual education and training are necessary to keep workers up to date on changing technical and industry requirements. Workers who are educated, trained, skilled, and safe are always needed. They replace those who are retiring, repair and maintain existing utility systems, and build new infrastructure, supporting the ever-increasing demand for power.

To fulfill industry needs, the International Brotherhood of Electrical Workers (IBEW) and industry-leading utilities created the NUI TF (a Taft-Hartley training trust fund). Today's partnership includes the IBEW and the following utilities:

- Southern Company (Alabama Power, Georgia Power, Mississippi Power, Southern Company Gas)
- DTE Energy
- Evergy

## NUI TF TRAINING PROGRAMS

The NUI TF training centers offer the latest technology (including augmented and virtual reality programs) to enhance learning and maximize field preparation. Current training programs include:

- Apprentice lineman
- Substation technician
- Electrician (power plant, water & sewer distribution, production plant)
- Telecommunication lineman
- Cable splicing
- Many more

Additional programs under development include:

- Natural gas utility worker
- Electric metering
- Utility leadership
- Nuclear classifications (radiation protection)
- Overhead catenary system
- Drone pilot licensing

## AN INDUSTRY LEADER

The NUI TF is a partnership between the IBEW and a group of forward-thinking utility companies whose mission is to provide employees with the best education and training curriculums available.

Our programs equip students with the knowledge they need to be proficient in their crafts and, when partnered with appropriate on-the-job training, will set them up for success throughout their careers.
